		Claims	1-7, 12-17, 19-20	YES NO
I	ndustrial Applicability (IA)	Claims	1-21	YES

2. citations and explanations

Claims 1-7, 12-17, 19-20 lack novelty under PCT Article 33(2) as being anticipated by Thorne et al. (USP 4,678,752).

Claims NONE

Thorne et al teaches a method of performing a determination of an item of interest in an automatic analyzer 12, by providing a first container 40 for processing a sample comprising the item of interest, transferring the sample to the first container in a first process path, adding a reagent to the first container in the first process path, mixing the contents of the first container in the first process path, separating the item of interest in the sample form the contents of the first container, transferring the separated item of interest to a second container 38 in a second process paths 59, 18 within the analyzer, bringing the contents of the second container to a first temperature different from the temperature of the first process path in the second process path by incubation means 18, detecting the item of interest in the second container in the second process path by detector 19 (columns

The sealing means 24, 46 is taught at Fig. 2.

Claims 8-11, 18, 21 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest a method wherein the second process path includes a plurality of second process sub-paths, and wherein the transferring step comprises transferring the second container to at least one of the plurality of second process sub-paths.

Claims 1-21 meet the criteria of PCT Article 33(4) because a method of performing a determination of an item of interest has

Kind of non-written disclosure

Date of non-written disclosure (day/month/year)

Date of written disclosure referring to non-written disclosure (day/month/year)

WATTEN OFMION	PCT/US99/23622			
VII. Certain defects in the international application				
The following defects in the form or contents of the international application have been noted:				
•				
,				
•				

PCT/US99/23622

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 22 is objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because the claim is indefinite for the following reason(s): The claim lacks a body, it discloses only the preamble. Further, pages 54-55 are missing from the application.
